

## Thanks for downloading re.start

This Max For Live device enables you to re-start the Arrangement from any position. This is very useful when you are editing clips in arrangement, and you want always the arrangement to start from the same point.

The **set** button will place a “virtual marker” at the current playback position

When **restart** is clicked, the Arrangement position is be moved to the “virtual marker”

You can add an **offset** to the “virtual marker”. Playback will then start from + or - the number of bars.
